

How The  
-----

# NEUBIE Device Works

1

## Mapping (with 100% accuracy)

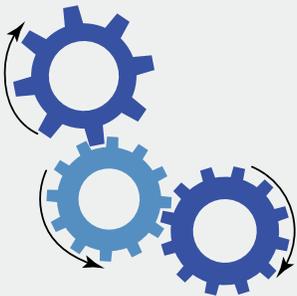

The key first step to getting game-changing results with the NEUBIE is to identify specific areas where there is a disconnect between the nerves and the muscles.

2

## Treatment (you move, you improve)

The NEUBIE varies from other e-stim therapy in that you must perform functional movements during treatment. This reprograms the nervous system.

3

## Success (automatic and immediate)

Once the neuromuscular re-education is performed with the NEUBIE, most patient conditions note significant improvement in only 1-4 sessions.

4

## Lasting Relief (restored function)

The NEUBIE's ability to reprogram the connection between the nerves and muscles helps the nervous system function properly with lasting relief.
